

Environmental policy

At Nolato Gota we integrate our environmental work in all parts of our operations.

We seek new business opportunities within sustainable development through development of material and technical evolution

We shall produce plastic parts with continuously improved environmental impact while maintaining quality

This

- Open environmental reporting
- Joint environmental responsibility
- We meet environmental requirements from our stakeholders
- We will take advantage of the opportunity to make environmental adaptations as we change processes and facilities.
- All employee shall get knowledge about the organisations environmental impact
- At Nolato Gota, we actively work to recycle all materials, when possible, (Example is scrap, office mtrl, waste heat .)

Our environmental work shall focus on continuous improvement based on the participation of customers, suppliers, employees and other stakeholders.
